

Fleet Management Software

 Live-link your assets and facilities.

ULTIMO

GREEN LIGHT

YOU, AS FLEET OWNER, LOOK AT MAINTENANCE AND THE ASSOCIATED TIME AND COSTS, ALSO FUELLING, INSURANCES AND DAMAGES ARE IN YOUR INTEREST. YOUR FLEET HAS TO BE ON THE ROAD, NOT IN THE GARAGE.

GREATER INSIGHT IN THE TOTAL COST OF OWNERSHIP (TCO) OF YOUR FLEET WHETHER YOU HAVE A DOZEN VEHICLES OR HUNDREDS, YOU WANT TO KNOW WHAT YOUR VEHICLES ARE 'DOING'. HOW ABOUT DOWNTIME? DAMAGES AND ACTIONS TAKEN? IS IT EASY TO FIND THE CONTRACT CONDITIONS FOR EACH VEHICLE? IS THERE PLANNING FOR REPLACEMENTS? AND FINE TUNING OF ACTIVITIES? ALL THIS IS SO MUCH EASIER WITH ULTIMO.

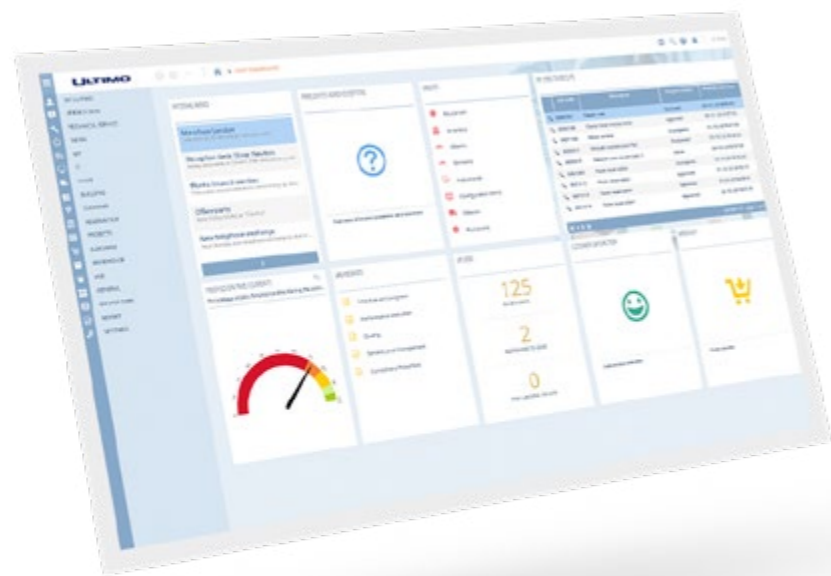

SEE VITAL SIGNS. TAKE VITAL ACTION.

APART FROM OUR MAINTENANCE AND FACILITY MANAGEMENT SUITES, ULTIMO HAVE ALSO DEVELOPED SOFTWARE SPECIALLY FOR FLEET MANAGEMENT. MOST OF WHAT YOU WANT TO REGISTER FOR YOUR VEHICLES IS INCLUDED. IT LINKS THE TECHNOLOGY OF YOUR FLEET TO ITS MANAGEMENT. MAKING YOU AS VERSATILE AS YOUR VEHICLES THEMSELVES. SEE WHAT IS UP NEXT AND CHANGE GEARS ACCORDINGLY.

'See vital signs. Take vital action.' simply means that you can respond to events you see occurring, or better yet, you anticipate. The Ultimo Fleet Management software gives you complete insight in all the elements of your fleet or fleets. Useful when you do your own maintenance in your own workshop, and even more so when you do administrative management as well. You also can use Ultimo when you manage your fleet and contract out the maintenance work.

Are you responsible for a fleet? Or specifically work in transport, safety regions or the waste industry? Are you looking for fleet management software that offers convenience and links easily to other operational software? Take your time to study Ultimo software. We can tell you everything you want to know about vehicle availability: maintenance, history, mileage, links to the OBC, dynamic vehicle data and scheduling preventive maintenance. Live-link your assets and facilities.

THE FLEET COCKPIT OVERVIEW AND CONTROL

RIGHT FROM THE MOMENT YOU START USING ULTIMO FLEET MANAGEMENT YOU ARE RECORDING INFORMATION DIGITALLY, CREATING AN OVERVIEW OF ALL THE INFORMATION AND BEING ABLE TO SEE MORE. SO, YOU CAN RESPOND TO WHAT YOU SEE.

You must record, secure and preferably link all vehicle-related information in your organisation for future use. Anything that is commercially interesting. Allowing you and your colleagues to take the right decisions based on the right data — the facts. Decisions about maintenance, replacements and other optimisations to increase efficiency further. Also, other far-reaching decisions. Enlargement of your properties perhaps, as “accommodation” for your vehicles. Or further integration within your IT Services. After all, the more your fleet tells you, the better conclusions you can draw.

It is possible to add information from the official vehicle registration website, telling you when the MOT is due. It offers you lots of other options so you can get a tight grip on the management of your fleet. For example, information from the tachograph and lots more. Ensuring you have all agreements ever made for a vehicle – financial, insurance, maintenance – at your fingertips. As they say: ‘Foresight is the essence of government’. As a standard, Ultimo Fleet Management contains a large number of functionalities. The basic package can also be expanded with optional modules.

Knowing your fleet

It is very common in organisations that information is stored in a multitude of places or, even worse, that it is only available in an employee’s head. As an organisation continues to grow, the inconveniences and risks of decentralised information storage increase. Fleet management software helps with structured knowledge management. This not only saves time searching, but also means that people get up-to-date information, and that the organisation does not suffer as much when someone retires or goes on sick leave. Information about contracts, fuelling, damages, failures, maintenance history and more is recorded in the software in a structured manner. It helps with gathering management information in dashboards and reports. Information that aids you in important decisions. Recording all this supports an effective and efficient processing of all types of work. It is so convenient to have all relevant information available and to use current schedules.

Optimum availability

One of the main reasons to use a software tool for fleet management is to understand the best availability of your vehicles. Time is money and downtime needs to be avoided as much as possible. You, as a Fleet Owner, can control when to deal with damages/faults/failures, when to schedule maintenance and inspections, etc. But it requires good tooling to schedule and align it well. Ultimo can help you with this, which is good news. Ultimo helps you to coordinate the simultaneous execution of a number of activities. You not only set the right time, but you can also determine who executes the job. This way you can avoid unnecessary downtime of your valuable fleet.

Total Cost of Ownership

Fleet management software gives you insight in costs and possible savings. The Total Cost of Ownership (TCO) can be an important criterion. Based on information about, for example, maintenance, depreciation and damages, you are able to take decisions and substantiate them. Examples of questions you can answer better with all this info:

- When is the time to purchase new vehicles?
- Is it more sensible to lease or buy?
- What are the consequences, also financially, when we postpone the purchase?

Of course, it is interesting to compare this information per type of object or vehicle brand and base your future investment decisions on that.

The results of your fleet management:

- All elements of your fleet are transparent
- Understandable dashboards and reports
- Invaluable for audits and inspections
- Better grip on operational costs and projects
- Optimum availability with less downtime, because corrective maintenance, periodical maintenance, and processing damages and faults are carefully aligned
- Practical support of your own maintenance service
- More insight into insurances and contracts, linked to a vehicle or object
- Optimal replacement planning of your vehicles or objects by mapping depreciation and replacement costs
- Use the TCO to take better substantiated investment decisions
- A number of practical interfaces available to work more efficiently

“In order to achieve the goal of ROVA, the quality and durability should be outstanding. That’s what it’s all about in process optimisation. That’s the main reason why we make use of Ultimo for asset and fleet management.”

Marnix Timmermans
ROVA

Business Integration

Together we can do more. This is the by-line of Ultimo software. Because of clever integration of Ultimo with systems that are relevant to your organisation can help you increase the return. The Ultimo Fleet Management software is often interfaced or integrated with:

- Transport management systems or On-Board Computers. This way object data, mileage and registration of defects can be read into Ultimo easily.
- Barcode scanners. Various options for time accounting, including options for start-stop registration, issuing materials and stock management.
- Importing article lists. To get a better understanding of stock management and purchase support.
- Importing fuelling info and registration of fuel cards.
- Financial systems. To easily charge costs and hours, or to support invoicing.

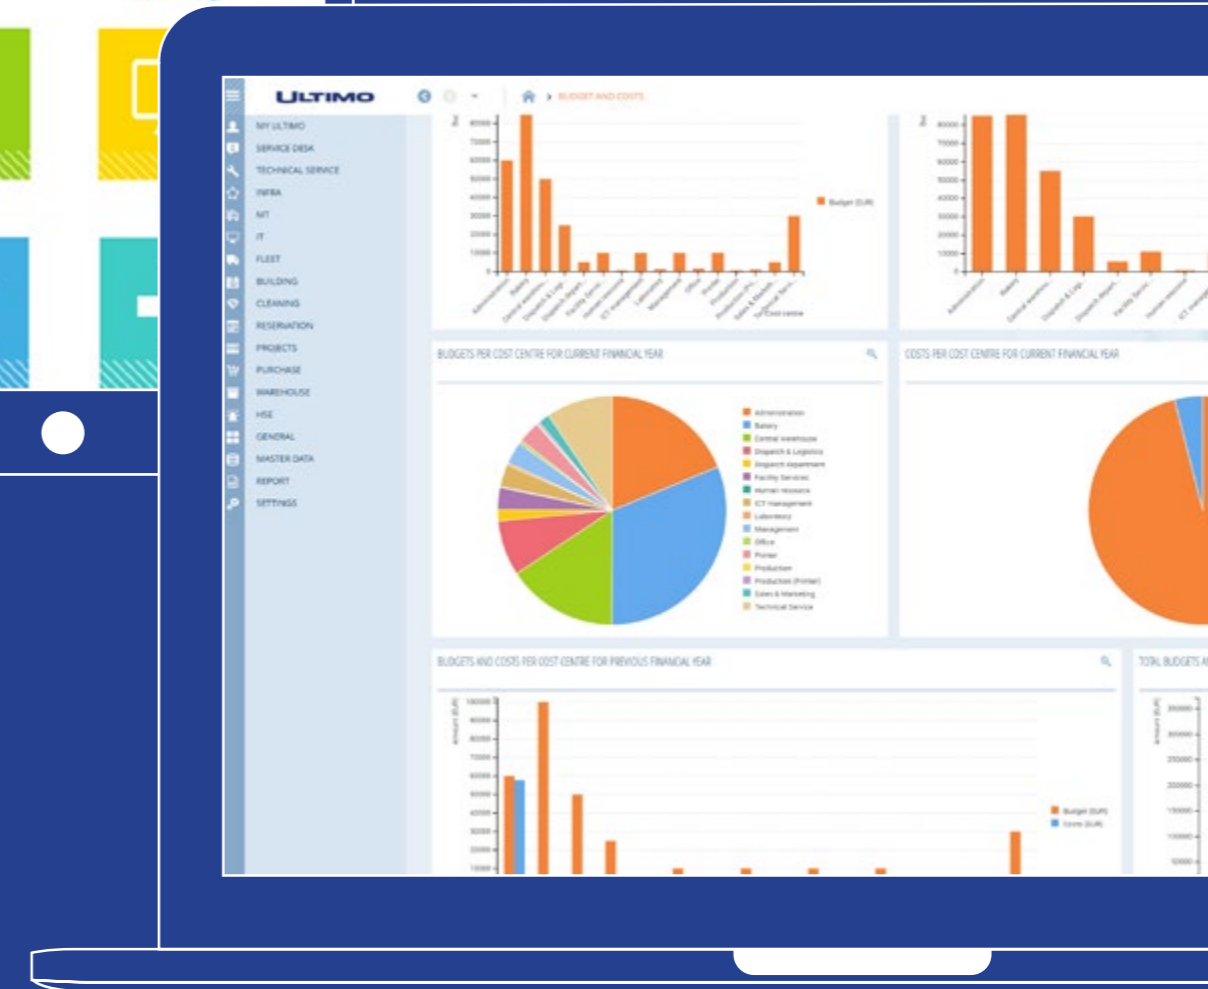

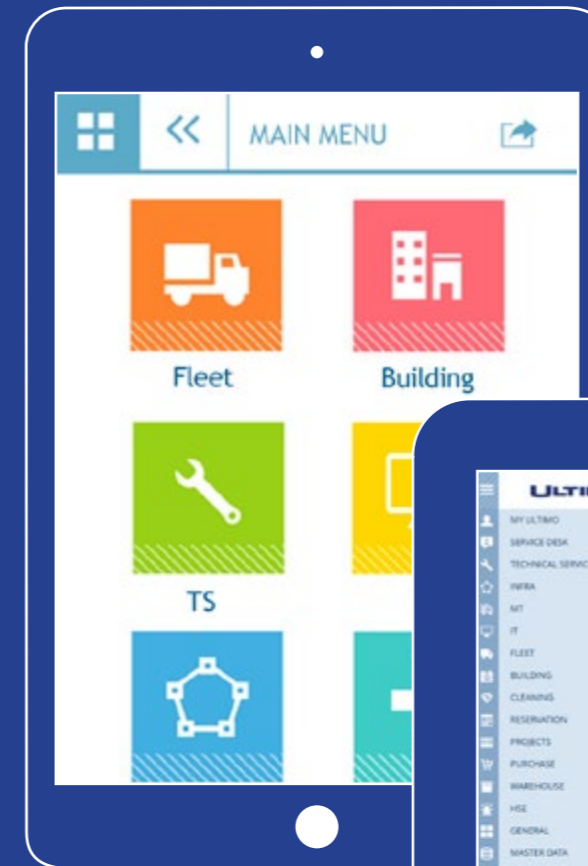

Ultimo Customization Tool

Ultimo provides you with proven and user-friendly standard software in accordance with market standards. However, because your situation is unique in certain aspects, we created our software to be easily customised. All to offer you extra returns and usability. Custom standard software, we call it. And flexible. Because Ultimo software allows you to easily manage, personalise and modify your application, without the need to program. This is true for application managers and (end) users alike.

Easy to use

Clever explorers, spacious panels, the use of icons and pictograms, the unambiguous screens with tabs, and the easy search possibilities. All characteristics of the user-friendly nature of our software. The apps Ultimo GO and GO+ can also make your life a lot easier. Use your smartphone or tablet to look up information, submit reports, or process activities. The Ultimo software is web-based. Purchase the software in one go and have it installed on your own server, or rent the software on a subscription basis and use the software in the cloud. This rental option — Software as a Service (SaaS) — means we fully unburden you in managing the software and updates.

Our fleet management software is used in different markets. Visit our website for cases describing how the suite is used.

Intuitive & user-friendly

Adaptable to your company's needs

Modular design & scalable

Available as SaaS solution (Cloud)

Easy to link (IoT, ERP, TMS, HR, etc.)

Best practice because we collaborate with customers

ALSO USEFUL

Get to know our professional services. Very helpful during the implementation of the software, and we also support you during regular use if you want us to. We not only developed our software but thoroughly thought about how we were going to implement it. We based our ideas of implementations on the project management method PRINCE2® and all our own experiences since 1988, but we are always open to your ideas on the implementation. After all, you want a properly functioning product that meets your standards and requirements. Implementation is something we do together. It's a matter of U&I². But don't think our services end here. You will meet our start-up coach during the start-up phase, with the specially designed 'Start-up canvas' A convenient tool to determine goals and discuss the method of operation. During and after implementation you have access to our Customer Portal, for example to consult project related information. And after implementation you get to meet our Customer Success Team. In a couple of sessions, they will get you up to speed with Ultimo.

You can also immerse yourself in our extensive offering of courses, in-company, traditional in-class or with e-learning; you can profit from the experiences other Ultimo users had and our consultants are available for heavy-duty advice. Just like you, we want you to get the most out of the software's advantages. And in case you have any questions or need support after implementation, please contact our Customer Support department. We would be happy to draw up a maintenance contract on request to secure the agreements concerning the use of the help desk and the updates of the software.

MOST WIDELY USED MODULES

This is a selection of the most widely used modules of Ultimo Fleet Management. The complete list of modules, what they can be used for and their specifics can be found on our website. Feel free to ask our advisors for the best combination of modules, consisting of an extensive basic package possibly with added optional modules. They will give you personalised advice.

Business Integration

Integrate Ultimo with various other business systems to work even more efficiently.

Contract Management

Comprehensible contract management.

Damage Management

Damages? So annoying! But when you have information you can take appropriate action.

Dashboards/Reports

Important control information directly available.

Depreciations

Anticipate the future and plan your replacements.

Fault Management

Understand the faults and failures of your vehicles and combine solutions with regular maintenance.

Fleet Management

Extensive management of your fleet for more grip on availability.

Fuelling (+)

Monitor the correct use of fuel cards. Also process mileage and fuel use and make the associated purchase invoices.

Insurance Management

All your insurances conveniently listed.

Invoicing

Invoice options for internal and external charging of costs.

Issue Management

Register the issue and collection of all of your company assets.

Periodical Maintenance

Plan your periodic activities and preventive work. For instance, based on mileage. Or MOT/inspections based on time.

Service Level Agreements

Do you enter into Service Level Agreements with your clients, also internal clients? Implement them well and honour your commitments on time.

Stock Management and Purchase

Manage your stock effectively, for example with the possibility of an interface with barcode scanning and support the purchase of articles.

Time Accounting

A complete survey of the time spent. With the option of start-stop hour registration.

Work Order Management

Complete handling of work orders.

SEVEN TIMES
INSIGHT AND
CONTROL.

Ultimo gives you one central platform for seven domains: Fleet Management, IT Service Management, Maintenance Management, Facility Management, Medical Asset Management, Safety Management and Infra Asset Management. Do you also profit from the integrated usage?

LIVE-LINK YOUR ASSETS AND FACILITIES.

The world is in a whirl, and it revolves around all your objects and equipment at the speed of light. If you are the one responsible for maintenance, facility or IT in your organisation, you want nothing more than your assets constantly letting you know whether they are still compatible with this world. And if you are responsible for more than that you want this as well. After all, your assets may require your attention in a more general, or even financial, way. Ultimo will be sure to pass on the crucial signals about your assets. So you can pick up on them and act decisively. Are you listening?
