ULTIMO

INTRODUCTION

WASTE MANAGEMENT COMPANY ROVA'S AIM IS INCREASING THE QUALITY AND SUSTAINABILITY OF THE ENVIRONMENT. ROVA OPERATES IN AN AREA OF ABOUT 900,000 RESIDENTS IN 23 PARTICIPATING COUNTY COUNCILS.

TO REACH ROVA'S GOAL, THEY FIRST HAVE TO OPTIMISE THEIR OWN QUALITY AND SUSTAINABILITY. THIS STARTS WITH PROCESS OPTIMISATION. THIS IS WHY ROVA USE ULTIMO TO SUPPORT THE PROCESSES SURROUNDING THEIR ASSET AND FLEET MANAGEMENT.

OUR SOLUTIONS

ROVA'S IT philosophy

Before purchasing Ultimo, ROVA supported every one of their processes differently, using everything from Excel sheets to e-mail workflows. "There was hardly any structure to be found and from a management perspective we wanted to offer the end users more support. Besides, there was a great deal of efficiency to be gained." The IT philosophy ROVA introduced? Have innovative applications support as many integrated processes as possible. "Ultimo meets our IT philosophy. The implementation of Ultimo allows our employees to do their jobs using just one application."

Ultimo widely used

"We are now using Ultimo for many things. We started with Asset Management and Fleet Management. This includes the management of our fleet and the activities in our workshop. But Ultimo also helps with the activities in our warehouse. Think of issuing small materials and the activities in the public areas." Many of ROVA's work takes place in the field. ROVA wanted to increase their efficiency, which is why they were looking for an innovative solution to support the reporting process in the public area(s).

The solution? Ultimo Go. Employees working in the field can use their mobile phones to receive and process reports. "For example, when they receive a report about aphids in a tree, the office staff enters the report in Ultimo, which is then linked to the person responsible for processing the report. They then receive the report while on location, on their mobile phones and can start work immediately. This innovative way of working has increased our efficiency substantially." But that's not all. ROVA wants to further intensify the use of Ultimo: "We want to use Ultimo for even more so the application and the relation with the supplier are exploited to the fullest."

"An innovative system that supports our asset and fleet management processes in an integral manner, that's what Ultimo is."

LIVE-LINK YOUR ASSETS AND FACILITIES.

The world is in a whirl, and it revolves around all your objects and equipment at the speed of light. If you are the one responsible for maintenance, facility or IT in your organisation, you want nothing more than your assets constantly letting you know whether they are still compatible with this world. And if you are responsible for more than that you want this as well. After all, your assets may require your attention in a more general, or even financial, way. Ultimo will be sure to pass on the crucial signals about your assets. So you can pick up on them and act decisively. Are you listening?
