ULTIMO

ALL YOUR ASSETS TELL THEIR STORIES. ARE YOU LISTENING?

The world is in a whirl, and it revolves around all your objects and equipment at the speed of light. Progress. New developments. Expanding. If you are responsible for maintenance, facility or IT you will want your assets to keep you informed at all times to see if they can keep up with it all.

If you are responsible for more than maintenance, facility or IT, you want that as well. It may well be that your assets require your general or financial attention. Due to growth, extra maintenance, or perhaps they are due to be replaced, or the next ISO certification is imminent. Ultimo will be sure to pass on the crucial signals about your assets so you can see them and act. Are you listening?

SEE VITAL SIGNS.
TAKE VITAL ACTION.

SEE VITAL SIGNS.

BAGGAGE CAROUSELS AT THE AIRPORT.
CT SCANS IN THE HOSPITAL.
INSTALLATIONS IN THE FACTORY. LOCKS
AND BRIDGES IN YOUR NATIONAL
INFRASTRUCTURE. COMPUTERS AND AIR
HANDLING UNITS IN YOUR OFFICES. THEY
ALL REQUIRE A PLATFORM SO THEY CAN
PROVIDE YOU WITH CLEAR INFORMATION.
THIS PLATFORM IS CALLED ULTIMO.

To keep your assets in top condition, or to compare them to your other assets. To guarantee their safety and bring them up to standard. Or to extract all data out of your assets, so you will know what to expect for the upcoming renovation. In all of these cases you require a platform to make everything clear. A platform that tells you all about your assets, in real-time. All things that are of great importance to you, so you always have sensible information about your assets and their service processes.

Ultimo developed a range of software modules for Facility, Maintenance, IT Service, Infra Asset, Medical Asset, Fleet and Safety Management. The result of our never-ending search for the best management processes. Because that's what it's all about: you need a platform with which you can manage all your assets and their processes. One platform, where all your assets provide you with their information. One platform filled to the brim with signals, especially the critical ones.

A PROCESS IS A SERIES OF LINKED INFORMATION FLOWS. PROCESS CONTROL IS THE ART OF STEERING ALL RELEVANT INFORMATION FLOWS IN THE RIGHT DIRECTION. INFORMATION STARTS WITH YOUR ASSETS, AND – HOWEVER YOU LOOK AT IT – ENDS WITH THE ACTION YOU TAKE.

TAKE
VITAL
ACTION.

We consider process management a people-driven field. Ultimo will help you to make actual decisions, managing your service processes in the best way possible, based on information submitted to you. This requires smart software. We, effectively, take a magnifying glass to your working methods and use our expertise to translate these organisational processes into our specialised software.

We also expect our Ultimo software to communicate with other systems and therefore we offer precisely the right links. And, above all, it has to support an organisation's mission. You are in control of the technical state of your assets and the best way to use them. And at the same time of security and your finances. Our talent for automation and our knowledge of management used for your benefit. So you can listen to the signals you see and give the right response.

ONE PLATFORM. DOZENS OF PROCESSES.

WE LOOKED AT MANY COMPLETELY DIFFERENT PROCESSES AND DISCOVERED A WHOLE LIST OF SIMILARITIES. BECAUSE ALL PROCESSES ARE DIFFERENT – TO A CERTAIN EXTENT.

This led to the development of one platform, with of course an impressive array of spin-offs, derived for the dozens of processes we are supporting. Either you have a great set of process thinkers and software developers together, or you don't. We design it. And we produce it. Everything to improve the management of your assets and processes.

Do you want to structure maintenance? Do you want more essential insight and better understanding? Listen to what your assets are telling you, as you can find it all in Ultimo. Do you want to realise cost savings? Increase efficiency? Improve performance? Top down inventory and horizontal approach. See the flow and go with it. Synergy in management and service processes. Our real expertise is creating a practical conversion of all your organisational processes. Ultimo will get the best from your people and business, and we don't mean to brag but our software is first-class! Our software is a means to an end, but with attention to user-friendliness. We continually engage our end-users.

IN THE WORLD OF ULTIMO,
MANAGEMENT PROCESSES
AND THE SOFTWARE THEY
REQUIRE TAKE CENTRE STAGE.
WE DEVELOP SOFTWARE
FOR MANAGING OBJECTS,
OR MACHINES, EQUIPMENT,
IT ASSETS, COMPLETE BUILDINGS
AND RELATED SERVICES.

We listened carefully to all the experience, points of special interest and all interesting data and facts our clients shared with us over the past 30 years. This is how we make our software into a high standard, while at the same time imminently flexible. Because your organisation and processes have to be flexible all the time. We listened to all process know-how we gained over the past decades. And put it back into our software. Every day.

Even when we began at the end of the eighties we focussed on processes. Processes that help companies and organisations operate to the best of their abilities. This is why we feel confident to call ourselves process specialists. Of course we combine our collective knowledge and create software – but we always do so with our process thinking-hat on. After all, people control all kind of things, but we rather not have these things control our lives. All our work at Ultimo is to make life safer, customer-friendly, well-ordered and easier. For you.

FACTS AND FIGURES

WHY IT REALLY WORKS.

OUR SOFTWARE IS INTUITIVE AND STRAIGHTFORWARD, WHETHER ON DESKTOP, TABLET OR MOBILE PHONE. CUSTOMISED. MODULAR, SCALABLE, EASY TO INTEGRATE, OPERATES ON A DESKTOP, TABLET AS WELL AS YOUR MOBILE PHONE. IT IS THOROUGHLY THOUGHT THROUGH. BUT THE REAL REASON THAT ULTIMO IS EFFECTIVE IS THAT WE TAKE OUR TIME AND SIT DOWN WITH YOU TO CONSIDER YOUR PROCESSES.

We sit down to consider your processes. We sit down to look at all the assets that carry information and that have to project this information right into your organisation. Then, and only then, are we going to design standards just for you. We begin with the implementation. Give you support. Offer you training and coaching. And engage our Customer Success Team. That is really why Ultimo is successful.
